LENGTH:

114:42 (62:59 + 51:43)

SOURCE (AUD #1):

AT853RX > Sound Devices SD-722

TRANSFER:

SD-722 (firewire) > Ecasound 2.4.x > CD Wave 1.96.1 > Trader's Little Helper 1.1.1 (Build 90)

GENERATION:

Master WAV [96kHz] > WAV [44.1kHz] > FLAC [Level 8]

NOTES:

Recorded in section red, on the side, before the corner. Not my transfer this time, the taper supplied me with the WAV files and I only did the track indexing. He recorded the show initially in 24-bit/96kHz mode, the files have been downsampled and normalized before I received them and now they are ready to be burned onto CD. As for splitting the CDs; you don't have to split them as I did, all of the tracks will seamlessly join without any fadings or cuts.

Although this has never been recorded on any tape(welcome to the 21st century)
I still decided to let it out as a TA release. Kudos to Trevor for sharing his master!
